RHINO ARK OBJECTIVES

Rhino Ark seeks solutions to the challenges facing the mountain forest ecosystems of Kenya, also known as the water towers. More specifically, Rhino Ark aims to:

- (i) Protect Kenya's mountain forests, other threatened habitats and their rich biodiversity;
- (ii) Engage and educate adjacent communities in conservation;
- (iii) Secure the connectivity between mountain forests and other threatened wildlife habitats;
- (iv) Establish sustainable financing mechanisms for the conservation of mountain forests and other threatened wildlife habitats;
- (v) Advocate nationally and internationally for the conservation of the mountain forests and other threatened habitats, their wildlife and their ecological functions; and,
- (vi) Use science to assess the impacts of, and review conservation interventions.

EXECUTIVE DIRECTOR'S VIEW

CHRISTIAN LAMBRECHTS

Rhino Ark and our annual Rhino Charge fundraiser have just turned 30. The achievements over the past three decades place our work at the summit of conservation efforts in Kenya. But the journey since the humble beginnings in 1988 is even more remarkable. The journey is about individual belief and commitment. It is about not just discussing solutions and sharing ideas, but investing the necessary time and energy to actualize these ideas. It is also about leadership: engaging and empowering people to take care of public goods, including the environment, hence securing their future and the future of the entire society.

At the outset, there was one man, Ken Kuhle, an engineer with a strong passion for conservation. Today, thousands of Kenyans and many corporations are part of the Rhino Ark movement. They share an undeniable love for this country and commitment to its future.

Too often we do not believe or realize how much power each of us have to bring positive change in our society. But some of the most successful conservation projects were driven initially not by government, but the people. We, at the individual level, can make a difference.

To date, over 620 kilometres of electric fence have been completed and are maintained. This includes the 400 km long fence around the Aberdares and the 43 km long perimeter fence around Eburu Forest. It also includes 180 km of the ongoing Mt. Kenya Electric Fence, which will be about 450 km long when completed... the longest in Kenya, and possibly the longest conservation electric fence in the world.

These fences are protecting some 80,000 households from the threats of human/wildlife conflict. They have resulted in improved farmland security and safer living conditions. Today, along those fences, forest-adjacent communities can live in harmony with the forests and their wildlife, and the forests are better protected from illegal activities.

As a trust with a national purpose, Rhino Ark is committed to addressing the challenges affecting key water towers and threatened forest habitats across Kenya. As the challenges facing these forests increase, so too is Rhino Ark growing. From our initial focus in central Kenya (in the Aberdares and Mt. Kenya), we have undertaken conservation projects in Eburu and South Western Mau forest in the Mau. Presently, Rhino Ark, together with key partners, including national government conservation bodies, county governments and community forest associations, is initiating a major fencing and conservation project in Kakamega Forest. The good work continues and expands...

RHINO CHARGE 2018 - RESULTS - AWARDS

Car 23 receives the 1st David Schaefer Trophy for the highest cash sponsorship in 2018

FUNDS AWARDS

1st David Schaefer Trophy:	Peter Kinyua/ Tomie Hellerstedt/ Moses Nyagah/ Johan Mistiaen/ Raju Singh/ Tom Morton	KES: 24,780,681	Car 23
2nd Diamond Trust Trophy:	Alan McKittrick/ Bruce Knight/ Kyle Ray/ Graham McKittrick/ Jon Bovard/ Doungu Smith	KES: 21,138,381	Car 5
3rd Highest cash sponsorship:	Adil Khawaja/ Mario Brigetti/ Abid Khawaja/ Jameel Sheikh/ Massimiliano Brigetti/ Nelson Lekamisi	KES: 16,217,000	Car 44

EVENTS AWARDS

1 st Overall (Duncan Mitchell Perpetual Trophy):	Mark Glen/ Bryn Llewelyn/ Gerard Beaton/ Piers Daykin/ Steve Outram/ Johnny Harris	Car 48
2 nd Overall:	Sean Avery/ Patrick Avery/ Kieran Avery/ Harry Brainch/ Alan de Boer/Damian Fison	Car 38
3 rd Overall:	Alan McKittrick/ Bruce Knight/ Kyle Ray/ Graham McKittrick/ Jon Bovard/ Doungu Smith	Car 5
Victor Ludorum (Land Rover Trophy):	Alan McKittrick/ Bruce Knight/ Kyle Ray/ Graham McKittrick/ Jon Bovard/ Doungu Smith	Car 5
1 st in Class U:	Eric Goss/ Ole Johansen/ Henrik Barner Rasmussen/ Lars Tejlgaard Jensen/ Jorgen Nielsen/ Ivy Mutiso	Car 54
1 st in Class M:	Mark Glen/ Bryn Llewelyn/ Gerard Beaton/ Piers Daykin/ Steve Outram/ Johnny Harris	Car 48
Coupe Des Dames (Tim Nicklin Perpetual Trophy):	Sabine Kontos/ Petra Somen/ Lucy Waddington/ Emma Morton/ Catherine Coulson/ Millie Seagon	Car 19
Spirit of the Charge (Rob Combes Trophy):	Alasdair Keith / Sam Jethwa/ Bruce Roberts/ Charles Mousely/ Martrien Piet	Car 25
Tim Samuels Gauntlet Challenge:	Adil Khawaja/ Mario Brigetti/ Abid Khawaja/ Jameel Sheikh/ Massimiliano Brigetti/ Nelson Lekamisi	Car 44
Tiger Line 1 (Njia ya Ndume Award):	Mark Glen/ Bryn Llewelyn/ Gerard Beaton/ Piers Daykin/ Steve Outram/ Johnny Harris	Car 48
Tiger Line 2 (Njia ya Ndume Award):	Torben Rune/ Alex Gibbs/ Paul Berriman/ Luc de Villele/ Chris McIntosh/ Francois Rousseau	Car 28
Kamran Fazal Memorial Trophy:	Toby Francombe	Car 40
Properly shafted Award:	Mark Reading/ Anthony Stow/ Eric Boulay/ Chris Homes/ Jonathan Mills/ Amy Marsh	Car 15
Most Meritorious International Team:	Bharat Pattni/Darren Tait/ Thomas Rossiter/ Matthew Neasham/ Graig Jenkins/ David Kamau	Car 55

OUR TEAM SPIRIT

We would like to express sincerest appreciation to all those who made it possible to stage the event:

ORGANIZING COMMITTEE AND OFFICIALS

David Lowe - Chairman Rhino Charge Committee/Clerk of the Course
 Christian Lambrechts - Rhino Charge Committee/ Executive Director Rhino Ark
 Max Meinzingen - Rhino Charge Committee/Logistics/ Search & Rescue
 Steve Grant - Rhino Charge Committee/Security
 Peter Gethi - Rhino Charge Committee/Community Liaison/Headquarters
 Asim Shah - Rhino Charge Committee/Head Quarters/ Logistics
 Tarsem Sembhi - Rhino Charge Committee/Water & Fuel
 Jeremy Andrade - Rhino Charge Committee/ Scrutineering
 Amar Desai - Rhino Charge Committee/Search & Rescue
 Valerie Gunputrav - Rhino Charge Committee/Rhino Ark Liaison
 Anton & Belinda Levitan - Search & Rescue/Maps
 Dr Benjamin Wachira - Event Doctor
 Devina Meinzingen - Headquarters/ Sponsors/Social Media
 Leah Levitan - Social Media/Website/Portal Administration/Raffle
 David Gachuche & Tom Kioko - Results/ Rivercross
 Magdelle Dampers & Eric Kihui - Radios/ Venue Check-in

George Gunputrav & Melinda Grant-Weir - Venue Check-in
 Willis Ojal - Security - KK Security Guards
 Kim Bhari - Finance Field Audit
 Jan Allan - Fixed Wing Aircraft
 Mike Cheffings & Bruce Field - Gyrocopter Pilots
 Malcolm Simon - HQ infrastructure/ ICTs & Database/ Vehicle Safety Monitoring
 Ross Field - Air Band Radio/Competitor Information
 Jinita Shah - Guard Posts Of ficer Liaison/Radio
 Helen Feather - Finance/Vehicle Safety Monitoring
 Raju Chagger & Eric Weir - Scrutineering
 Raymond Kibanga - Waste Sorting Station
 Tejash Joshi - Search & Rescue
 Colin & Tony Church - Competitor Information
 Tracey White - Raffle Desk

GUARD POST OFFICIALS

Gran & Rosemary Calder, Willem Dolleman, Dave Green & John Porter, Nick Martyn, Gavin Bennett, Geoff Dagger, Julian Cordingley & Nick Trench, Mandeep Rajbans, Dez Page-Morris, Henry Wainwright, Rainie Samuels, Kat Combes, Amrit Sehmi.

HQ ASSISTANTS & LOGISTICS

Nehal Halai, Bhaveshree Hirani, Brian Owango, Emma Lowe, Sue & Brian Haworth, Donna Sheppard, Melinda Grant- Weir, Ali Bush, Neeral Shah, Joseph Mutongu, Adam Mwangi, Samuel Kagiri, Crispus Mwangi, Bindya Parbat, Sandra Hill

RAFFLE COMMITTEE

Helen Feather, Valerie Gunputrav, Belinda Levitan, Leah Levitan, Devina Meinzingen, Kate Mwangi, Aparna Patil, Henrietta Remnant, Lulu Roy & Tracey White

GUARD POST SPONSORS/ SERVICE SPONSORS:

Aqueous, AutoXpress, Avocado, Betting Control & Licensing Board, Boskovic Air Charters, Bins Ltd, Braeburn Schools, Canvas by Design, Castor Vali, Express Automation, Chloride Exide, Alpha Risk Management Ltd, Heritage Insurance, Highlands Mineral Water, Ignite Africa Ltd, ITbiz Systems, KCB, Kenya Motor Sport Federation, KWS, KK Security, Liberty, Liquid Telecom, Litchman Consultants, Mantech Inflight Systems, Onn The Way Supermarket, Northscape Contracting, Papyrus, Printfast, Ramani, Response Med, Rivercross Tracking, Safaricom, USN, Tarpo, The Iceman, KIDL, Vates Corp, Total, Wells Fargo, Toolcrafts, Brookhouse School, Copy Cat, Hardi Kenya, Karen Vineyard Church, Greensteds International School, Little Red, Satao Camp, Slater & Whittaker.

RHINO ARK'S 30 YEARS IN CONSERVING KENYA'S MOUNTAIN FORESTS

The year 2018 marks 30 years of the Rhino Ark Kenya Charitable Trust in conserving Kenya's mountain forests and other critical ecosystems for the dual benefit of people and nature. Since its establishment in 1988, Rhino Ark has been a leading conservation organisation in supporting the protection of the mountain forests. It has crucially raised awareness among forest-adjacent communities, securing connectivity between mountain forests and other threatened habitats, while establishing sustainable financing mechanisms, advocacy and use of science to support the review of its conservation interventions. These conservation efforts are based on the recognition of the critical economic, social, cultural and ecological functions played by these ecosystems, ranging from water provision, biodiversity conservation to carbon sequestration, which support key economic sectors such as energy, tourism and agriculture.

Population pressure, increase in demand for forest products, encroachment, illegal activities and climate change, continue to threaten the integrity of these fragile ecosystems leading to human-wildlife conflict, loss of biodiversity and water scarcity among many challenges. Rhino Ark was initially established to address two of these challenges: human-wildlife conflict around the Aberdare National Park which was by then a major threat to the adjacent communities and the dwindling rhino population due to rampant poaching.

ADDRESSING THE PROBLEMS

Committed to addressing these problems, Rhino Ark started its first conservation project to build a 38 km game-proof electric fence around the perimeter of the eastern salient of the Aberdares. The initial parallel benefits associated with this fence resulted in a spontaneous demand leading to an expanded scope for the project. By 2009, the world's longest conservation fence of around 400 km, protecting over 2,000 sq. km of the Aberdare conservation area, was completed and subsequently commissioned in 2010 by President Mwai Kibaki and Prime Minister Raila Odinga. An independent assessment of the 20-year impact of this flagship project affirmed that it brought with it positive outcomes. These included: a increased forest cover (20.6% from 2005-2010); a 54% decrease in open areas inside the fence; and higher household incomes and land values at 300%, in some

cases. The fencing project helped contribute to more stable river flows with a total domestic water supply value of KES 2.1 billion, safer living conditions for local communities, and greater security for wildlife. All this has affirmed that the fence is an effective management tool for mountainous ecosystem conservation.

Based on the success of the Aberdare fence, the need for Rhino Ark to expand its mandate to address challenges in other key mountain forests, and high public awareness on the importance of conserving the water towers, Rhino Ark started to construct similar fences for Mt. Kenya and Mau Eburu. The 43.3 km long fence for Eburu was completed in 2014 while 180 km of approximately 450 km of the Mt. Kenya fence have been completed. Furthermore, Rhino Ark is already in the initial stages of the South Western Mau fencing project. So far, over 620 kilometres of electric fence have been constructed and some 80,000 households are now benefiting from the fences Rhino Ark has built to secure their livelihoods and living in harmony with the forest and its wildlife.

Beyond its fence building projects, Rhino Ark's task is to ensure that the fences are properly managed and that their protective functions are effective. This means constant monitoring and vigilance. Every four kilometre of fence is checked, maintained and repaired daily by one fence attendant. Along the Aberdare Fence, there are 114 fence attendants. In Eburu, there are 11. In addition, Rhino Ark conducts periodic surveillance flights above Mt. Kenya, the Aberdares, and South Western Mau, which enable Rhino Ark and its partners to detect illegal activities and mount joint operations.

To secure wildlife movement between the fenced ecosystems and the neighbouring conservation or dispersal areas, two wildlife corridors for migrating wildlife such as elephants, have been established, one linking the Aberdares to Kipipiri Hill and the other on private land connecting Eburu Forest to Lake Naivasha. The third wildlife corridor, connecting the Aberdares and Mt. Kenya, is in progress.

Rhino Ark has also supported forest adjacent communities in the implement of various nature based-livelihood projects such as apiculture and in the development and implementation of conservation curricula, such as in Eburu where such curricula are now implemented in 32 primary and secondary schools surrounding the forest. These

curricula provide a model for the Government towards establishing a national conservation curriculum for all levels of education and will be replicated in other ecosystems where Rhino Ark works.

UNIQUE APPROACH

Rhino Ark's success over the years has been due to its unique approach in achieving its objectives, which is defined by building and sustaining effective partnership platforms involving key government institutions with a mandate to conserve Kenya's natural habitat -notably the Kenya

Wildlife Service, the Kenya Forest Service - and the private sector. The engagement and active participation of all stakeholders, and particularly forest-adjacent communities, help to deliver effectively Rhino Ark's projects and to secure long-term sustainability. Indeed, Rhino Ark's work has helped to define a new paradigm in collaboration between the public and private sectors and provides a blueprint for the conservation of Kenya's water towers. These partnerships foster efficiency and effectiveness by leveraging the relevant strengths of the respective partners while avoiding duplication.

Since its inception, Rhino Ark has continued to raise funds to support its conservation efforts with the Rhino Charge, a world renowned annual motorsport event, being the cornerstone of its funding. Since its inception, the Rhino Charge has raised a total of over KES 1.5 billion. While the first Rhino Charge in 1989 raised KES 250,000, this amount has increased remarkably over the years to reach over KES 183 million – a record with the 2018 event.

LANDMARK ANNIVERSARY

The year 2018 marks the 30th anniversary of both the Rhino Ark and Rhino Charge, a notable landmark. In addition, the launch of the 'Thirty Years of Rhino Charge' book, is another reminder to go back in time with its partners, sponsors, and the public and examine the lessons learned on the road to successful outcomes.

Rhino Ark not only owes its success to the small but effective Rhino Ark team, with a committed board of directors, and dedicated staff, but also to its strategic partners, supporters, forest-adjacent communities, schools and the general public for their continued and unwavering support. Rhino Ark shares its success with them.

There is no doubt that, over the next 30 years, threats and pressures on the mountain forests and other critical ecosystems will continue to rise and demand for conservation interventions will continue to increase. As such, Rhino Ark's work of protecting mountain forests and other threatened ecosystems will be more relevant than ever before. At the same time, putting in place sustainable financing and institutional arrangements, such as endowment funds for the Aberdares and Mount Eburu projects, will be essential if the projects are to be sustained.

VITAL SUSTAINABILITY

The sustainability of the fencing projects will not only depend on robust financing and institutional arrangements but also on the ownership and cooperation from the forest-adjacent communities. Thus, Rhino Ark will continue to effectively engage and ensure the full participation of the forest-adjacent communities through livelihood conservation projects and school conservation education programmes.

Rhino Ark recognises too that ecosystems do not thrive in insulation and therefore to guarantee their health and integrity, it will be essential for Rhino Ark to continue connecting the mountain forests with other threatened habitats through securing wildlife corridors while promoting the re-establishment of riparian areas.

In order to persuade the national government to continue to meet its commitments and obligations to protect mountain forests and other threatened habitats, Rhino Ark will strengthen its advocacy, policy engagement and communication of success stories to raise the profile of these fragile ecosystems and subsequently influence policy makers, partners and the public to take positive conservation actions.

Rhino Ark remains committed to implementing effective conservation interventions. Thus the use of scientific evidence will continue to be at the core of assessing impacts, and monitoring the performance of projects and health of the ecosystems.

Finally, future success will depend on Rhino Ark's ability to retain and maintain its longstanding partnerships and bring in more support in order to mobilise adequate resources. This will require a dedicated fundraising strategy and increased human resource capacity to secure the core funding from the Rhino Charge, increase support from government and private sectors, with overseas contributions from Rhino Ark UK and USA, endowment funds and the payment of ecosystem services.

Rhino Ark looks forward to these challenges in the critical years ahead.

RHINO CHARGE 2018 CAR SPONSORS

Car 1:

Don White, Mike Diesbecq, Edward Verbeek, Jono Kelmanson, William Rous, John Saraber

KEEPING THE ENVIRONMENT CLEAN

To reduce the generation of plastic waste associated with one-use plastic bottles, everyone was provided with a multiple-use metallic water bottle.

To promote waste recycling, a waste sorting station is set up at the venue every year

CORRECTION:

In an article on Hog Charge published in the May 2018 issue of Arkive magazine (page 18), we erroneously mentioned that Banda School's Team 194 (Hog of Zombies) was the highest cash sponsor. We would like to make a correction and state that it was Banda School's Team 200 (Percy Piglets) who emerged the highest fundraiser raising a total of KES 301,950.

Indeed we apologize for the mistake and any inconveniences caused.

Please note that the 21st edition of Hog Charge will be held on the weekend of January 19th / 20th 2019 at Northlands / Peponi Secondary School. All are welcome.

FOR ENTRY DETAILS PLEASE EMAIL hogcharge@peponischool.org

EXCERPTS FROM RHINO ARK CHARITABLE TRUST ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2018

RHINO ARK KENYA CHARITABLE TRUST NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2018

1. SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below:

(a) Basis of preparation

The financial statements summarise the transactions of the Trust and deal with the net assets at the disposal of the Directors. The financial statements are presented in Kenya Shillings (KES), which is the Trust's functional and presentation currency.

The financial statements are prepared under the historical cost basis of accounting except where otherwise stated in the accounting policies below.

(b) Income recognition

Donations and Rhino Charge collections are recognised on receipt.

Investment income is recognised on accrual basis.

(c) Property and equipment

Items of property and equipment are stated at cost less accumulated depreciation. Depreciation is charged on the straight line basis over the estimated useful lives of the assets.

The annual depreciation rates in use are:

Motor vehicles	25.0%
Furniture and fittings	12.5%
Computers	33.3%
Office equipment	12.5%

(d) Foreign currency transactions

Transactions during the year are converted into Kenya Shillings at the rates ruling at the transaction dates. Assets and liabilities at the reporting date, which are expressed in foreign currencies, are translated at the rates ruling at that date. The resulting differences from conversion and translation are dealt with in the income and expenditure account.

(e) Financial instruments

A financial instrument is a contract that gives rise to both a financial asset of one enterprise and a financial liability of another enterprise. The financial instruments held by the Trust are investments in the money market, trade and other receivables, bank balances and cash and trade and other payables.

All the financial instruments held by the Trust are accounted for on amortised cost basis.

(f) Receivables

Receivables are stated at nominal value, less provision for any amounts considered irrecoverable.

(g) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short term deposits with an original maturity of three months or less.

(h) Use of estimates

The preparation of financial statements requires that management makes estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates. The more significant estimation process is related to the determination of provision for doubtful debts. Although some variability is inherent in these estimates, management believes that the amounts provided are adequate

2. PROPERTY & EQUIPMENT

(a) For the year ended 31 March 2018

	Motor Vehicles KES	Furniture, fittings and equipment KES	Computers KES	Total KES
COST				
At 1 April 2017	37,581,230	28,832,330	3,371,040	69,784,600

6. RELATED PARTY TRANSACTIONS	2018 KES	2017 KES
Key management compensation:		
Salaries	14,328,135	13,606,852
Pension	2,400	2,400
	<u>14,330,535</u>	<u>13,609,252</u>

7. GENERAL FUND	2018 KES	2017 KES
At 1 April	86,859,271	51,759,615
Surplus/(deficit) for the year	28,054,849	35,099,656
At 31 March	<u>114,914,120</u>	<u>86,859,271</u>

8. INCOME	2018 KES	2017 KES
Rhino Charge collections (note 8 (a))	141,242,320	134,078,436
Other income (note 8 (b))	11,339,891	17,313,858
Other donations (note 8(c))	20,199,273	14,980,560
Interest income	6,293,054	3,229,329
	<u>179,074,538</u>	<u>169,602,183</u>

(a) RHINO CHARGE COLLECTIONS

Rhino Charge 2018	16,042,597	-
Rhino Charge 2017	125,199,723	16,238,917
Rhino Charge 2016	-	117,839,519
	<u>141,242,320</u>	<u>134,078,436</u>

Donations for the Rhino Charge (RC) are booked in the financial year that they were received. As the RC is held in the month of June each year, total RC donations will therefore be booked in two financial years, that is, the total 2016 RC donations are reflected in 2017 and 2018 financial years.

(b) OTHER INCOME

Bongo surveillance project	5,160,237	12,011,577
Operations base – Aberdare	2,545,339	2,029,882
Miscellaneous income	3,634,315	3,272,399
	<u>11,339,891</u>	<u>17,313,858</u>

(c) OTHER DONATIONS

Other donations are monies received from various donors for projects specific to Rhino Ark. In the current year, there were donations received from MPESA Foundation and IDH for South West Mau project, Eburu Rafiki for conservation of Mau Eburu and from Mount Kenya Trust for the conservation of Mt. Kenya.

9. ABERDARES EXPENSES	2018 KES	2017 KES
Fence Maintenance	7,481,833	6,913,791
Staff costs	-	1,269,987

	<u>12,233,737</u>	<u>18,400,709</u>

11. MT. KENYA EXPENSES	2018 KES	2017 KES
Staff costs	7,102,898	6,627,273
Allowances	8,275,508	13,388,444
Depreciation on property and equipment	352,358	675,353
Fence costs	3,779,443	5,761,905
Motor vehicle costs	1,069,474	1,244,273
Other costs	1,874,063	1,606,582
	<u>22,453,744</u>	<u>29,303,830</u>

12. SOUTH WEST MAU EXPENSES	2018 KES	2017 KES
Allowances	572,868	-
Public Relation	79,307	-
Staff Costs	3,012,098	-
Fence and Other Costs	3,019,808	5,140,442
	<u>6,684,081</u>	<u>5,140,442</u>

13. FUND RAISING EXPENSES	2018 KES	2017 KES
General fund raising	16,269,011	16,800,061
Rhino charge raffle and event costs	6,830,664	4,949,544
Rhino charge filming	1,382,240	1,262,500
	<u>24,481,915</u>	<u>23,012,105</u>

14. ADMINISTRATIVE AND GENERAL EXPENSES	2018 KES	2017 KES
Depreciation on property and equipment	3,825,645	3,629,015
Bank charges	311,395	274,305
Office management and administration	28,375,012	24,707,061
Auditors remuneration	1,505,410	1,400,000
Public relations and press	2,928,660	264,645
Foreign exchange loss	241,930	379,459
Vehicle running expenses	1,237,893	1,316,371
	<u>38,425,945</u>	<u>31,970,856</u>

15. CASH AND CASH EQUIVALENTS
Cash and cash equivalents included in the statement of cash flows comprise of the following statement of financial position amounts:

Cash and bank balances	24,956,918	22,489,853
Call deposits	70,082,714	42,029,348
	<u>95,039,632</u>	<u>64,519,211</u>

16. LEGAL FORM
Rhino Ark Kenya Charitable Trust was established in 1991 under an irrevocable trust in accordance with the Laws of Kenya.

17. TAXATION
The Trust has been granted exemption from taxation under the First Schedule to the Kenyan Income Tax Act (Cap 470) under Certificate number 20170214/11869 dated 14 February 2017 valid for 5 years.

18. EVENTS AFTER THE REPORTING DATE
The Directors are not aware of any material events or circumstances that have arisen between the accounting date and the date of this report that would require adjustment to, or disclosure in, these financial statements.

19. CURRENCY
The financial statements have been presented in Kenya Shillings (KES).

Audit by **ERNST & YOUNG**

The year 2017-2018 was marked by key developments in our major new projects in Mt. Kenya and South Western Mau.

It was also one of continued support both from thousands of donors to the annual Rhino Charge, direct corporate donations and a resumed significant support from the Treasury through Kenya Wildlife Service for the procurement of materials for the Mt. Kenya fencing project.

Whilst the Mt. Kenya and the Mau were at the centre of our current & forward planning and funding in the year, the Aberdare Fence, Rhino Ark's initial flagship project, remained a major focus of funds disbursement for its maintenance.

Rhino Ark is preparing for the fencing of the most vulnerable boundary of South Western Mau Forest Reserve, the largest forest block in the Mau Forests Complex. This builds upon the initial conservation activities carried out in South Western Mau in partnership with the Netherlands-based IDH Sustainable Trade Initiative and their project 'Initiative for Sustainable Landscape (ISLA)' aiming at conserving that forest and bringing sustainability in the broader landscape.

In addition to the 38-kilometre Phase I of the electric fence, along the Eastern Salient of the Aberdare National Park, Rhino Ark has also started the rehabilitation of the 40-kilometre Phase II that was completed in 1994. The fence in both phases has outlived its intended lifespan.

Overall funds 2017/18

The total funds raised during the financial year under review were KES 178.3 million. This included donations from Rhino Charge, Corporates and other donations.

Despite the difficult economic times, the 2017 Rhino Charge exceeded expectations and raised at field audit a total of KES 153 million or approximately US\$ 1.53 million.

The Treasury through Kenya Wildlife Service (KWS) was a major donor providing KES 37 million for fence materials. As those funds were not channelled through our accounts, they are not reflected in our balance sheets, although they are earmarked in support of our fence projects in Mt. Kenya. In addition, the Kenya Rural Road Authority has committed approximately KES 8 million towards the construction of four animal grids along the Mt. Kenya Electric Fence in the Imenti Forest.

Every kilometre of fence built under the partnership agreements with KWS specifies that materials are provided by Treasury funds or key partners, whilst Rhino Ark's inputs include payments to personnel for each completed kilometre of fence, vehicles, machinery, fuel, tools and mobile housing. In addition, both KWS and Rhino Ark commit management time for constant supervision and issues resolution with communities along the pre-planned fence alignment.

Corporate / conservation bodies support

Corporate and consensual grant supporters continued positively.

I would like to acknowledge the following organisations that have made generous contributions:

- IDH-ISLA for donating KES 8.2 million for a feasibility study of establishing a physical barrier along the north-eastern boundary of South Western Mau Forest Reserve, as well as for strategic and technical support and aerial surveillance.
- Safariicom Foundation for donating KES 8.2 million for the South Western Mau Forest Reserve which is part of the KES 11 million they have pledged.
- Mount Kenya Trust donating KES 2 million for fence construction on Mt. Kenya.
- Rare Species Conservatory Foundation for donating KES 5.16 million in support of the conservation of the Mountain Bongo antelope.
- Wildlife Conservation Society, through the Mount Kenya Trust, donated KES 3 million towards the building of one-way elephant gates in the Imenti Forest.
- AutoXpress donated to KES 2.5 million worth of tyres for the years 2018 and 2019.

Wider Mau Eburu conservation well underway

The construction of the 43.3 kms perimeter game-proof electrified fence completed in November 2014, is now over three years old. The fence protects 8,715 hectares of indigenous forest within the Mau Forests Complex Water Tower.

Rhino Ark, along with KWS, KFS and Loldia Farm have completed the securing the wildlife corridor between Eburu Forest Reserve and Lake Naivasha, with one joint security outpost, one wildlife water point and the electric fences along the corridor between the Moi North Lake Road and Eburu Forest completed. This fence helps in reducing illegal human activity as well as contains wildlife within a safe zone while protecting surrounding communities from human/wildlife conflict. Rhino Ark has also provided support to establish a ranger outpost at Ndabibi gate, to enhance forest protection work in the Ndabibi zone.

A unique development in preparation is the building of a wildlife overpass above the Moi North Lake Road. The Kenya Rural

Road Authority has endorsed the overpass proposal and already lowered the road to provide for the required height.

The 5-year (2017-2022) Participatory Forest Management Plan (PFMP) for Eburu forest has been completed. The plan was developed with technical and financial support from the Rhino Ark, in collaboration with KFS and other key partners. The PFMP implementation committee, in which Rhino Ark is represented, has been formed to pave the way for roll out of the plan.

Eburru Rafiki has recently secured funding for grassroots educational outreach work, in partnership with Rhino Ark. Their main focus is on community sensitization on forest conservation, governance and alternative livelihoods. With this funding Rhino Ark has developed a new conservation outreach kit and carried out effective outreach work amongst the forest adjacent communities.

Support for community livelihoods is being provided through linking local communities with agricultural experts, with Rhino Ark facilitating the farms visits and training of community groups on an ongoing basis.

The ongoing model schools tree nurseries project, an initiative supported by the MPESA Foundation continues to grow. Construction of two new nurseries, in Morop Primary School and Elementaita Primary Schools has been completed, bringing to 7 the current total of operational nurseries under this programme. The nurseries are helping to enrich the pupils' conservation learning experiences and expose them to best practices through training and practical work.

The school tree nurseries programme is working in tandem with the ongoing conservation education programme in local primary and secondary schools around Eburu forest. Rhino Ark continues to support the programme through regular mentoring visits by our field outreach team.

With the support of Calgary Zoo, an exciting new Mountain Bongo monitoring initiative has kicked off in Eburu forest to prepare ground for the eventual establishment of a sanctuary. The initiative will also provide further detailed information on threats to the bongo and their forest habitat.

Mt Kenya fencing project

A total of 170 kilometres of the Mount Kenya Electric Fence has been completed. The fence will eventually encircle Mount Kenya. By the time it is finally constructed, the fence will reach 450 kilometres – giving protection to a World Heritage Site, a precious water towers and a unique range of biological diversity. The built fence currently runs from Kiringa River, Kirinyaga County, passes through Embu and Tharaka Nithi counties and is now in Meru County where it has reached the Muchene corridor linking Mt Kenya with the Imenti forest. The Mount Kenya Electric Fence is constructed under a public-private partnership, involving Government agencies (Kenya Wildlife Service (KWS) and Kenya Forest service (KFS), Rhino Ark, the Upper Tana Natural Resources Management Project, Mount Kenya Trust and the local communities.

Rhino Ark, together with KWS, KFS and local communities, completed the construction of the 43 km long fence in the Imenti Forest, which is a known human-wildlife conflict hotspot. Further work has been done on the completed Imenti fence, including the re-alignment of a three kilometres fence section in Tigania West.

To enable to movement between Shaba National Reserve and the Imenti Forest, three elephant gates have been built.

Four animal grids are being built on the Kirachene-Malukumi road that crosses the Imenti Forest. These grids are financed by the Kenya Rural Road Authority.

Aberdare ecosystem

Although the Aberdare Electric Fence is completed, Rhino Ark is involved in the daily maintenance of the 400 km fence. Routine fence maintenance is carried out.

The Aberdare Joint Surveillance Unit (AJSU), which has been strengthened, continued conducting operations in the Northern Aberdare. The purpose of the continued patrolling efforts is to address illegal activities in Northern Aberdare which is a known hotspot area. AJSU also participated in a comprehensive assessment of the status of the 400-kilometre fence together with a technical team from KWS to ensure that all minor repairs are properly done and identify area that would require some level of rehabilitation.

The rehabilitation of the animal grid at Kieni was completed last year, and the two grids at Geta have been repaired and upgraded to sustain heavier traffic.

As part of the rehabilitation of Phase I of the Aberdare Electric Fence, the 5 km fence section at Ruhuruni has been entirely rebuilt. Rehabilitation of Phase II has also started. This is part of the long term commitment of Rhino Ark to the conservation of the Aberdare ecosystem.

Rhino Ark, with KFS and KWS, conducted a surveillance flight above the forests on the western slopes of Aberdare and Kipipiri Hill. These flights have helped in reducing illegal activities, in particular charcoal making and logging.

Rhino Ark in partnership with Challenge Aid, a UK based Charitable Trust, extended the community library project dubbed 'School of Hope (SOH)' to include three schools. The concept of SOH is to provide a facility where learners can converge after the normal school hours to do private studies and do homework/school assignments. SOH project has been established in three schools around Aberdare – SOH Bondeni, SOH Njogu-ini and the latest is SOH Wanjerere Pny School.

The Rhino Ark Nyeri office was officially opened on 28 February 2018 which will host the CEO of the Aberdare Trust and the Field Coordinator of the Bongo Surveillance Project.

South Western Mau ecosystem

Over the last three years, Rhino Ark has been advising the Netherlands-based IDH Sustainable Trade Initiative in the formulation and implementation of their project 'Initiative for Sustainable Landscape (ISLA)' aiming at conserving South Western Mau Forest Reserve and bringing sustainability in the broader South Western Mau landscape. Rhino Ark has taken the lead in

coordinating the forest conservation portfolio of the ISLA project.

As part of the South Western Mau landscape conservation project funded by IDH, Rhino Ark, with the help of IDH and Finlays conducted quarterly surveillance flights above the South Western Mau Forest Reserve to monitor the state of the forest. The most recent flight showed a significant reduction in charcoal making and illegal logging. However, livestock grazing remains very high, with several enclosures observed deep in the forest.

Rhino Ark also conducted a surveillance flight above the South Western Mau landscape including the upper catchments of Sondu and Mara rivers. The flight was to apprise senior officials of the challenges affecting the forests and other areas in the upper catchments of these two critical rivers, as well as to detect illegal activities.

Fencing of the eastern boundary of the South Western Mau Forest reserve is a key goal of the South West Mau landscape conservation project. This will help to address human-wildlife conflict challenges faced by the forest adjacent local communities, as well as provide Kenya Forest Service with a management tool to better control human access into the forest. Towards preparing for the fencing work, a detailed technical survey of the forest cut line was carried out in September-October 2017, with the 30km proposed Phase I of the fence reviewed and costed. In addition, a preliminary Environmental and Social Impact (ESIA) reconnaissance survey was carried out in February 2018. The survey has enabled preparation of a clear ESIA implementation plan.

Mobilization for implementation of a conservation education curriculum in local primary and secondary schools has commenced with the carrying out of a comprehensive schools survey. Approval for this programme was secured from Nakuru County education office. The stage 1 and stage 2 are now completed and a survey of 46 schools was carried out. Building on the experience gained from the seminal Eburu schools programme, the survey collected detailed technical data on the schools, including population, facilities/ infrastructure, GIS data and an assessment capacity to host the programme. Further surveys are planned to identify more schools in the area, but the findings of the surveys have provided the basis to plan the conservation education programme implementation.

Rhino Ark, with the financial support from Finlays and technical support from KWS, has completed the construction of a new outpost for KFS rangers at Kusumek. It is the second of the two outposts that were planned for establishment in 2017 to support the forest protection work. The quarterly aerial surveillance flights conducted by Rhino Ark, with support from IDH/ISLA and Finlays, revealed that north eastern boundary is the most vulnerable boundary of the forest.

The General Fund

We have removed the split between Fence Maintenance Reserve and Fence Construction Reserve and shown it as one line: General Fund.

Bongo Surveillance Programme (BSP) successes

The Bongo programme continues apace, thanks to a dedicated band of conservation individuals who constantly seek out fund support from a variety of donors. A further USD 50,000 was received during the year from Rare Species Conservatory Foundation and EU 8,500 from IDH towards the BSP. The funds go towards collecting vital information about the Bongo, patrols, removal of snares and spear traps, as well as to the dynamic Bongo wildlife schools outreach programmes under BSP.

Other initiatives

Rhino Ark and the Mount Kenya Conservation Forum, together with key partners, including Kenya Wildlife Service, Mount Kenya Trust and Space of Giants, organized the first workshop for landowners that are located in the identified elephant corridor linking Mt Kenya and the Aberdare on 28 July 2017. The aim was to inform of the benefits of establishing a secured corridor as well as to share experiences from other wildlife corridors established in Kenya: Eburu Forest-Lake Naivasha and Mt Kenya-Ngare Ndare Forest.

Following the workshop, a committee was established chaired by a land owner representative to spearhead the establishment of the corridors. The committee has met severally and has also engaged KFS and KWS towards addressing illegal activities in Thego Forest.

Thousands to thank

Rhino Ark has an enormous following both in Kenya and now greatly developed overseas as well. Much of the fund raised focuses upon the annual Rhino Charge where individual car entrants make substantial pledges and raise even more than their pledge each year. It is a grass roots conservation thrust within Kenyan society that has now developed a deep foundation. Every donor knows that Rhino Ark's ventures are to secure the nation's precious 'water towers' and to work in partnership with the government to ensure good governance for maximum benefits. The 2011 Environmental Assessment triggered by Rhino Ark and with support from UNEP and the East African Wild Life Society's Kenya Forests Working Group (KFWG) has placed a value on the Aberdare alone at KES 59 billion (which amount to 95 billion when adjusted to present value) annually in good/services (water being the most important) and in biodiversity benefits. This equals to approximately KES 530,000 per hectare per year.

It is always difficult to single out thanks in a report like this. Rhino Ark Kenya Charitable Trust has thousands of donors in Kenya and friends overseas who support our home grown and home driven conservation initiative.

I thank all of you for your generous support.

I wish to especially thank the Rhino Charge Committee and the huge band of volunteers who yearly give so much time, thought, ideas and energy to running this unique event.

Isaac Awuondo
Chairman, Board of Directors

RHINO ARK NEWS

NEW APPOINTMENTS – RHINO ARK STAFF

ADIL KHAWAJA - DIRECTOR

Adil Khawaja is the Managing Partner of Hamilton Harrison and Mathews, and an internationally recognized leading lawyer. He specializes in commercial law, corporate law, real estate law, energy, oil and gas, commercial litigation and arbitration.

He has also vast experience in land and environmental law, and recently served as a member of the Task Force on the Inquiry into Forest Resource Management and Logging Activities in Kenya.

In addition to his role at Hamilton, Harrison & Mathews, Adil is the Chairman of KCB Bank Kenya Ltd, Director at Kenya Power & Lighting Company Ltd and Director of CMC Motor Group.

Adil has a passion for philanthropy, conservation and adventure. This has brought him to the Rhino Charge where he has been competing for many years and where he is among the top fundraisers.

He served previously as a Trustee of the Kenya Wildlife Service and has been an Honorary Warden for many years. He also served as a member of the National Environment Council.

JULIUS KAMAU

Julius Kamau has joined Rhino Ark as the new Deputy Executive Director. Julius is a forester and a conservationist with over 15 years of experience in taking actions, negotiating and influencing decisions that supports sustainable management and protection of the environment and natural resources in the region.

Julius has a great wealth of experience in the management of forest resources and environmental programme design, fundraising and execution in the private, public and international development cooperation sectors. He has worked with Sotik Tea Company as the Forest and Environmental Coordinator; Embassy of Finland as the Forest Specialist; Embassy of Sweden (SIDA) as the Regional Programme Manager; Intasave Africa as the Regional Director, and the East African Wild Life Society as the Executive Director.

Julius holds a Master of Arts degree in Environmental Planning and Management (University of Nairobi), a Bachelor of Science degree (1st class honours) in Forestry (Moi University) and a diploma in International Environmental Law Making & Diplomacy (UNEP/ University of Eastern Finland). He is also a registered Environmental Impact Assessment (EIA) Lead Expert.

THOMAS MUTAI

Thomas Mutai has joined Rhino Ark in the position of Outreach Officer, South Western Mau. Thomas has experience in forestry issues and has previously worked for Finlays. He has received training from the Forestry Action Network, and is a member of Olenguruone Community Forest Association. Earlier this year,

prior to joining Rhino Ark, Thomas participated in the Rhino Ark SW Mau schools survey as a volunteer. His local knowledge and contacts proved to be an invaluable asset during the exercise.

Operationally, he will be based full time in the SW Mau ecosystem. He is tasked with implementing our community outreach programmes with a focus on local schools (conservation education) and in the wider community, to propagate the conservation message and values. He will work at the grassroots level to ensure that local communities of all ages and backgrounds achieve and maintain a high level of awareness about conservation and about Rhino Ark's activities in support of the same. The addition of Thomas strengthens and expands Rhino Ark's operational footprint on the ground in SW Mau.

PARTNERSHIP BETWEEN RHINO ARK AND COUNTY GOVERNMENT OF KAKAMEGA COINED

Rhino Ark Deputy Executive Director, Mr. Julius Kamau met with H.E Hon. Wycliffe Ambesta Oparanya, Governor Kakamega County in his office in Nairobi, also in attendance was the Kakamega County Chief Advisor- International Partnerships Hon. Andrew Toboso. The meeting discussed a partnership on protection of biodiversity of Kakamega forest and enhance its ecotourism potential by electing a perimeter electric fence and building the capacity of the local community to conserve and generate income from the forest. H.E the Governor affirmed that the County Government of Kakamega will commit KES 100 million over the next 3 years towards this initiative adding to Rhino Ark's commitment of a similar amount. The partnership will also include Kenya Wildlife Service, Kenya Forest Service and the private sector.

HIGHLIGHTS FROM THE MOUNTAINS MAU EBURU ECOSYSTEM

WILDLIFE CORRIDOR MONITORING SYSTEM IN PLACE

Photography by Samuel Mungai, KWS

Since December 2014, the Eburu-Lake Naivasha Connectivity Committee has been the platform through which coordination of the Eburu-Lake Naivasha wildlife corridor initiative have been carried out. Through the efforts of this Committee, much has been achieved, including: (1) Construction of an electrified game-proof fence along the corridor boundary allowing for secure wildlife movement between Eburu Forest and Lake Naivasha; (2) Construction of a wildlife water point fed by tapped geothermal steam; and (3) Linking local communities with experts and

donors who have provided alternative livelihoods support towards reducing dependence on forest resources, among others.

The work of the Committee is helping to provide a more secure habitat for wildlife. Towards gaining a better understanding of the status and the movement of wildlife populations in the areas adjacent to the corridor, a wildlife monitoring initiative has been launched. The scientific monitoring work is being carried out by the Kenya Wildlife Service's research team based at Hell's Gate National Park. The work will involve bi-annual field monitoring within the corridor and adjacent farms.

The inaugural wildlife monitoring survey was carried out on April 2018, and covered the large farms and conservancies in the area including Crater Lake, PRC, Korongo, Rocco, Wileli, Ol Suswa, Aquila, and the riparian area of Lake Naivasha. The technical report of the monitoring was formally presented to the Committee at its meeting in September 2018, by Samuel Mungai of KWS. The survey team documented the presence of various wildlife species within the surveyed area including Maasai giraffe, warthog, impala, spotted hyena, aardvark, dik-dik, olive baboon, buffalo, black backed jackal, waterbuck, eland, vervet monkey and common zebra.

The findings of the report and its conclusions are helping the Committee to identify and address relevant issues. The second survey will be carried out in late 2018. Rhino Ark is providing the funding support for the monitoring work.

NEW COMMUNITY OUTREACH TRAINING SERIES KICKS OFF

Rhino Ark is organizing a series of local community forums designed to sensitize the community on conservation related issues. The series commenced on October 1, 2018 and comprised 10 open meetings (barazas) held at various accessible locations. The meetings, convened with the help of local chiefs and community leaders featured awareness creation and training on forest conservation, wildlife and forestry law, alternative

energy solutions and training, best agricultural practices, ecotourism and participation in the community forest association. Experts in these various aspects provided relevant advice and training to the communities that participated in the barazas.

Outreach session at Songoloi

To enhance the conservation message provided in the barazas, posters and brochures were produced for dissemination to the community members. These posters were complemented with wrist bands containing key messages to promote conservation of Eburu Forest. The wrist bands were given to community members and other stakeholders participating in the barazas.

Funding support for the outreach series has been provided by Eburru Rafiki, a community-based organization, under a 2-year commitment for 2018 and 2019. This current outreach activity builds on the great success of the 2017 outreach series implemented by Rhino Ark with the support of Eburru Rafiki.

EBURU ECOSYSTEM CONSERVATION PROJECT OFFICIALLY COMMISSIONED

Cabinet Secretary, Ministry of Environment & Forestry, Hon. Keriako Tobiko and H.E Lee Kinyanjui, Governor Nakuru County unveil commissioning plaque

CS Keriako Tobiko discussing honey production at Ogiek home

CS Keriako Tobiko powers on the fence as Christian Lambrechts, Rhino Ark Executive Director looks on

The Eburu Ecosystem Conservation Project received a major boost on June 19, 2018 with its official commissioning by a high-profile team. The Chief Guest, Cabinet Secretary Hon. Keriako Tobiko was accompanied by Nakuru County Governor H.E. Lee Kinyanjui, Kenya Forest Service Chairman Peter Kinyua, MPESA Foundation Chief Executive Officer Les Baillie, Rhino Ark Board Director Perez Olindo and Rhino Ark Executive Director Christian Lambrechts. Kenya Forest Service and Kenya Wildlife Service (Rhino Ark's key partners in the project) management teams were represented by Acting Chief Conservator of Forests Monica Kalenda and Deputy Director Michael Kipkeu. Over 1,000 members of the Eburu Forest adjacent communities attended the function.

The high-profile team of guests committed a full day in the field to attend the commissioning event that kicked off with inspection of a model tree nursery off at Eburru Primary school. The programme continued with an extensive fence line briefing on the fence project by Rhino Ark Executive Director Christian Lambrechts, who highlighted the positive changes that have taken place over the past five years since Rhino Ark initiated the implementation of the Eburu Ecosystem Conservation Project. Thereafter, Hon. Tobiko inspected the Fence Energizer House and officially switched on the power of the 43.3 km perimeter fence and unveiled the commemorative commissioning plaque.

Hon. Tobiko visited the home of Maseto Kusen, an Ogiek community member, and was received by Maseto's family and other members of the Ogiek community. The homestead, located just inside the forest boundary is the only remaining home found within the forest. Hon. Tobiko was briefed on the forest-based beekeeping livelihood activity carried out by the community. He gave a word of encouragement to the group and went ahead to purchase honey from them and urged stakeholders to support them.

Led by Hon. Tobiko, all the guests then embarked on planting trees to enrich a degraded section of the forest that was previously encroached upon and is currently regenerating thanks to the protective functions of the fence. As this section of the forest is becoming healthier, it has become a good foraging ground for bees. Guests observed that over 500

beehives have been placed in the area by the Bee-keeping Kiserian Group whose Chairman Joseph Lengetu met and briefed Hon. Tobiko. Beekeepers around Eburu Forest have been beneficiaries of a series of training organized by Rhino Ark to improve the honey production processes.

The formal section of event took place at the scenic Narungare glade inside the forest. The launch by Hon. Tobiko of (The Mau Eburu Forest-Visitor's Guide Book produced by Rhino Ark), and the Participatory Forest Management Plan (developed with Rhino Ark support), were among highlights of the event. Hon. Tobiko also formally received the conversation education curricula implemented by Rhino Ark in forest adjacent schools.

In the formal remarks by key speakers, Governor Lee Kinyanjui acknowledged the significant tourism potential of Eburu forest and pledged to work with stakeholders to ensure that this potential was actualized.

In his keynote address, Hon. Tobiko thanked MPESA Foundation, Rhino Ark, the Treasury and James Finlays Kenya Ltd for their financial contribution towards the project. He highlighted the importance of public-private partnership, in which Kenya Forest Service, Kenya Wildlife Service Rhino Ark and the local communities played a key role as implementing partners. Hon. Tobiko underlined the commitment of the Government to improve the forest cover. He noted the outcome of the recent Government Task Force to inquire into Forest Resources Management in Kenya, in which Rhino Ark Executive Director was a member and the Chair of the Forest Conservation Committee.

The formal commissioning of the project now opens a new chapter in Eburu Forest conservation. Heightened focus is on establishing the Eburu Trust to ensure long term sustainability, building further the capacity of local communities in both conservation and alternative livelihoods, and strengthening the partnership platforms established by the project.

MODEL SCHOOL TREE NURSERIES PROGRAMME- ADDING NEW SCHOOLS

Improved potting boxes at Elementaita Primary School nursery

In tandem with the Conservation Education programme, Rhino Ark is continuing to implement model tree nurseries in selected schools around Eburu Forest. So far, a total of seven schools, Emmanuel and Ndabibi Primary in Ndabibi Location, Loldia Primary in Malewa Location, Eburru and Songoloi Primary in Eburru Location, Morop Primary in Ol Jorai Location and Elementaita Primary in Kiambogo Location are fully operational. Pupils in these schools receive detailed practical training in growing tree seedlings and actively participate in tree nursery management in their respective schools. To address challenges posed by the ongoing (national) shortage of potting tubes for seedlings, the school nurseries have innovated by recycling paper packing cartons as alternative materials for potting tubes.

The next two schools in line to establish the nurseries are Munanda and Tangi Tano Primary schools in Kiambogo location, with construction works commencing in October 2018. Funding support for tree nurseries is being provided by The MPESA Foundation.

MOUNTAIN BONGO TRAP CAMERA STUDY UPDATE

Camera set up by team

Female bushbuck with calf

Blue monkey

The intensive 1-year camera trapping programme at the Mau Eburu Forest Ecosystem commenced earlier this year with the objective to gain information on the remnant mountain bongo population, its habitat preferences, and threats in Eburu Forest through the set up 60 camera traps to blanket the alpine forest ecosystem along a regular grid spaced approximately 1 to 2 kilometres apart. To date, the team comprised of 6 trackers from nearby communities, has managed to set 30 of the intended 60 cameras. The team has faced set up and monitoring challenges including extremely challenging, near-vertical bushwhacking terrain and heavy rains from early March to end of May, among others.

Despite the challenges of doing good science in the forest, the team continues to monitor the traps on a regular basis. So far, the cameras have been gradually revealing the secrets of the Eburu Forest. Well-placed cameras can have upwards of 2,000 to 3,000 images every 45 to 60 days. Species trapped so far include leopard, bushbuck, black and white colobus monkey, buffalo, duiker, giant forest hog, honey badger, genet, blue monkey, and more. But the one the team want to see most – the mountain bongo – remains elusive. Nevertheless, the team are optimistic of seeing the bongo in the months to come.

The findings at the end of the 12 - month survey will be delivered to the National Bongo Task Force to inform decisions about future interventions to recover this imperiled species. The study is supported by Calgary Zoo and is being implemented in collaboration with the Bongo Surveillance Project.

“EBURU’S GOT TALENT” CONSERVATION COMPETITION SUCCESSFULLY CONCLUDED

Girls from Ndibithi Primary School in a competition performance

The 2018 Eburu’s Got Talent was a song, dance and poetry competition featuring the mountain bongo and the Eburu Forest subject matter. The primary goal of ‘Eburu’s Got Talent’ was to sensitize the local forest-adjacent communities to the plight of the critically endangered mountain bongo and instil them with a deep understanding of the need for sound forest conservation. The competition was organized over a 4-month period from March to June 2018. A panel of community judges was selected each weekend for the various preliminary competitions between the 32 Wildlife Clubs in schools adjacent to the forest.

Through the preliminary stages, the teams were narrowed down to the top 10 teams to compete in the finals, with the competition format being effective in bringing the cream to the surface. The teams presented many clever, insightful and factually accurate poems and songs which had been rehearsed to perfection. The audience were connecting with nature almost by accident as they sang along and took the words to heart. The winning teams (1st, 2nd, 3rd plus an individual excellence award) were treated to nature field trips thanks to financial support from the World Association of Zoos and Aquariums (WAZA). The full membership of the winning wildlife clubs were able to immerse themselves in nature on 1-day or 3-day field trips with hands on conservation and wildlife experiences.

70 video DVDs of all competitions and nature field trips were distributed to all participating schools, and community stakeholders more widely, so that the songs and their powerful conservation messages can live on. These keepsakes can be viewed time and time again and will re-inforce the conservation messages contained within. Eburu’s Got Talent was greeted with enthusiasm and excitement in all participating communities, with many expressing their hope and desire to see the competition return as an annual event.

SOUTH WESTERN MAU ECOSYSTEM

FOREST REHABILITATION WORK COMMENCES

Community receives site briefing

The long standing challenges of livestock overgrazing, illegal logging, charcoal burning, illegal settlements and encroachment have significantly impacted on the forest cover in the South Western Mau Forest Reserve. Large areas of previously pristine indigenous forest are now heavily degraded. To address this challenge, much forest rehabilitation is required.

Under the Initiative for Sustainable Landscapes (ISLA), and with funding support from Safaricom Foundation, Rhino Ark is undertaking forest rehabilitation in collaboration with Kenya Forest Service. An initial area of 20 hectares in the Kipkoris zone under Ndoinet Forest Station, adjacent to the forestry outpost along the forest cutline is the current focus of rehabilitation work. Starting in August 2018, preparations for rehabilitation work commenced, and by early October 2018 over 17,000 indigenous tree seedlings had been planted. Labour for the rehabilitation work is provided by the local community, organized through the Ndoinet Community Forest Association, with an average of about 200 community members participating each day in the replanting work.

BOMET COUNTY SECURITY TEAM JOINS AERIAL SURVEILLANCE FLIGHT

The increased focus on protection of the Mau Forests Complex is creating opportunities for stronger collaboration between the various stakeholders in the South Western Mau forest landscape and the security and administration sectors of government. On 20 September 2018, a senior delegation from Bomet County, led by the County Commissioner, Geoffrey Omoding, joined the SW Mau project team in a comprehensive aerial surveillance flight over Western Mau and South Western Mau forest reserves. Also participating in the flight were Bomet County Police Commander, Naomi Ichami, Kenya Forest Service Ecosystem Conservator (Bomet), Francis Misonge and Kenya Wildlife Service Kericho Warden, Salome Chelelgo, among others.

The flight, coordinated by Rhino Ark, provided the county security team with the opportunity to observe and appreciate the scope of illegal activities impacting on forest protection, including charcoal burning, logging, cultivation and livestock grazing in the indigenous forest.

The highly productive post-flight debrief meeting, attended by a wider county security team and senior representatives from project partners KFS, KWS, IDH, and Rhino Ark under the Initiative for Sustainable Landscapes (ISLA) framework

resolved to work closely together going forward to address the various conservation challenges facing the forest.

Logistical support for the surveillance flight (aircraft and pilot) was kindly provided by Finlays.

Flight group

CONSERVATION EDUCATION PROGRAMME UPDATE

Inside classroom at Konoin primary School

In preparation for implementation of a conservation education programme, a preliminary survey of schools was carried out between February and March 2018, by the Rhino Ark outreach team. This first survey identified 31 schools within 5km of the forest cut line. A follow

up survey aimed to expand the zone to within 8km of the forest and was carried out between May and July 2018. The two surveys have identified a combined total of 46 schools from Arorwet to Kapkembo (Kipsonoi River) along the 30km forest cut line zone, and to Kiptagich area. The scope of data collected was also expanded to capture information on fuelwood consumption and alternative energy use.

A GIS database of the schools and surrounding locations has been developed by Rhino Ark, and the schools technical data has been compiled into a database. Some highlights of the findings from the survey include: (1) A student population of over 16,000 pupils, with an average teacher to pupil ratio of 3/100; (2) Less than 50% of classrooms are permanent structures (stone built); (3) Over 46,000 trees planted within the last 3 years; (4) Less than 30% of schools have environment clubs. The data collected provides a baseline from which targeted conservation interventions in the schools can be identified.

CONSERVATION EDUCATION PROGRAMME UPDATE

Protected spring at Sukutek Secondary School

Canvas tank dam at Tinet Kapkoi Secondary School

Conservation Education Operations

Rhino Ark has engaged a consultant to assist in the technical implementation the conservation education curricula development. Consultative meetings have been carried out with KFS, KWS, Ministry of Education, County Governments (Nakuru, Kericho, Narok), Water Resources Authority, Wildlife Clubs of Kenya, Kenya Water Towers Agency, Kenya Institute of Curriculum Development, Conservation Education Society of Kenya, Kenya Forests Working Group and Africa

Forest Forum. The next step planned is organizing inception forum for key stakeholders, in preparation for detailed curriculum development work.

The conservation education programme is one of the key community oriented activities envisaged under the Initiative for Sustainable Landscapes (ISLA), with funding support provided by the Safaricom Foundation

FIELD STAFF RECEIVE TRAINING TO BUILD CAPACITY

Team training session

Project field work undertaken by Rhino Ark staff calls for a mix of both technical and people skills, and Rhino Ark is investing in its field staff through training.

Towards building capacity of its field staff, Rhino

Ark recently organized a 3-day team building and training for all field officers. The training topics covered included GIS, Photography and IT. This practical training, which was held in Naivasha, will provide the team with enhanced skills to collect needed data using GPS devices, and enable improved documentation of outcomes of Rhino Ark's project interventions. Field staff have been provided with new GPS devices and digital cameras.

To facilitate improved management of data within the team, Rhino Ark is leveraging technology by implementing a cloud based-solution through which field officers can share and access data with the head-quarters team. The team also received training on this new cloud solution, in addition to a corporate overview by Rhino Ark Executive Director, Christian Lambrechts, and a Public relations and communications briefing by Deputy Executive Director, Julius Kamau.

The training comes at a time when the field team has been expanded with the addition of two field officers in the South Western Mau landscape, and provided a great opportunity for the new members to bond with their colleagues from other landscapes.

BIOENTERPRISE (HONEY) PROJECT KICKS OFF

Training/Baseline survey session

Beekeeping is practiced by forest adjacent communities in the South Western Mau area. However, there is potential for the communities to expand their honey production and earn more revenue by increasing the number of hives and the quality of production techniques. Under the Initiative for Sustainable Landscapes Initiative (ISLA), funding support for bioenterprise has been provided to Rhino Ark by the Safaricom Foundation to support the local communities to maximize on potential market opportunities in production and sale of honey and related products.

In line with this objective, Rhino Ark has engaged a honey production consultant to undertake comprehensive capacity building for the local communities, starting in July 2018. The consultant with logistical support from the Rhino Ark South West Mau field team, has conducted a baseline assessment of the Community Forest Association user groups. 24 user groups in Kiptororo location and 36 user groups in Tinet location have been reached and a total of 828 community members (male 558, female 270) have directly participated in the training and baseline survey. Implementation of the programme is ongoing.

MT. KENYA ECOSYSTEM

PATROL MONITORING SYSTEM FURTHER EXPANDED ON MT. KENYA

Rangers after the training session

In partnership with ESRI, one of the worlds' largest mapping software company and Kenya Wildlife Service, Rhino Ark spearheaded the development of a patrol monitoring system currently implemented and further tested on Mt. Kenya. 12 rangers from the various stations on the mountain were trained on the use of the system and six high-end GPS deployed. The system allows managers to receive real-time information from the various patrol teams through a web-based interface and to analyse current and historical data.

The system is intended to become a protected area dashboard that will integrate additional information, such as vehicle movement and fence voltage.

ONE-WAY ELEPHANT GATE BEING PILOTED

To allow elephants coming from Shaba/Isiolo and from Meru National Park to enter into the recently fenced Imenti Forest, three manual elephant gates have been built. One of these gates has been upgraded into a one-way automatic gate with the financial support of the Wildlife Conservation Society and the Mount Kenya Trust. It is a prototype that, once properly tested, will be established on the other two elephant gates.

Elephants entering the Imenti Forest can move back to the north through the wildlife corridor established between Mt. Kenya, Ngare Ndare Forest and Lewa.

MT KENYA FENCE- IMPACT ON IMENTI FOREST

Rhino Ark's Mt. Kenya Fencing project in Imenti Forest came at a time when human-elephant conflicts were at peak levels. These have been completely alleviated thanks to the 45km fence section built in this area. The fence is securing sacred sites among the Ameru Communities. These include:

(a) King Muuru (Giant Meru Oak tree)

Popularly known by the locals as King Muuru (Giant Meru Oak - *Vitex keniensis*), it is believed to be the oldest tree in Meru Region and estimated to be over 360 years old. The tree is visible from Kenya Wildlife Service Office, Meru Station, and is 4 km from Meru town along Meru-Nanyuki highway. Its base diameter is approximately 2.7m and it takes seven adults holding hands in a circle to stand around it. The tree is unique as the stem is hollow with openings that serve as a 'door' and a 'window' and it can accommodate several adults comfortably.

In an effort to sustainably conserve the King Muuru and surrounding forest, the Community Forest Association (CFA) Meru Forest Station is seeking support of Rhino Ark to help in its gazettement as a National Monument and market it as a tourist attraction site

Imenti Fence-line crossing Meru-Nanyuki Highway

Right: King Muuru (Giant Meru Oak) in Imenti Forest

King Muuru's hollow trunk and the main 'door' in Imenti Forest

Nkunga Sacred Lake in Imenti Forest

Local community fetching water from Nkunga Sacred Lake in Imenti Forest

(b) Nkunga Sacred Lake

This lake covers 96 acres and is 2km off Meru-Nanyuki Highway. It is also a refuge for numerous water bird species. The lake is a sacred site used by Njuri Nceke (Ameru Council of Elders) to perform sacrifices especially at times of calamities such as drought, famine, disease and pest invasion.

Challenges that were previously facing the Sacred Lake:

- Illegal logging and charcoal production: the high canopy trees surrounding the lake were invaded by illegal loggers and charcoal making gangs;
- Meru County Government Dumping Site situated next to the lake;
- Unregulated grazing: huge herds of livestock are driven to graze in the forest.

Typical view of the Lower Imenti Forest, heavily colonized by *Lantana camara* with few scattered trees

Forest Rehabilitation in Lower Imenti Forest

Rhino Ark in partnership with Mt Kenya Trust, CFA, KFS and KWS are rehabilitating the lower Imenti Forest. A three-stand electric Fence has been constructed to secure a 50ha plot and 50,000 seedlings of indigenous trees planted under Tree Establishment and Livelihood Scheme (TELIS). The exercise involves manually uprooting of the invasive plants and planting indigenous seedlings.

ABERDARES ECOSYSTEM

ABERDARE FENCE MAINTENANCE: A CONTINUED COMMITMENT

New fence attendant guard posts

Maintenance of the signboards

The maintenance of the 400 km Aberdare fence has been on-going since its completion in 2009, with 114 fence attendants working daily on the fence. This also includes the rehabilitation of the fence sections that are over 20 years old: 23 kilometres of the 38 kilometres of Phase I have been entirely rebuilt; strainers assemblies along 14 kilometres (of the 40 kilometres) of Phase II have been rebuilt to date. It is expected that the strainer assemblies along the entire Phase II will be rebuilt by end of February 2019.

In addition, Rhino Ark and its partners KWS and KFS are continuously reviewing and improving the fence maintenance structure. This includes the establishment of new fence attendant guard posts to reduce the distance fence attendants have to walk to the fence sections they maintain, such as the Mundoro and Wanyaga fence guard posts that have just been completed in the southern part of the Aberdares.

Maintenance pertains to all aspects of the fence, including the signboards that were built to acknowledge support from donors, which have been entirely redone.

LANDOWNERS EXPLORING OPTIONS TO ESTABLISH THE MT. KENYA- ABERDARES WILDLIFE CORRIDOR

The landowners and stakeholders that attended the meeting

Landowners in the proposed Mt. Kenya-Aberdares Wildlife Corridor met at the Sangare Wildlife Conservation on 22nd September 2018 to discuss legal options to establish the corridor.

The discussions were informed by a legal opinion prepared by Prof. Patricia Mbote from the Faculty of Law of the University of Nairobi, and commissioned by Rhino Ark to answer key questions raised by the landowners. Prof. Mbote and two Research Fellows from the University attended the meeting to provide clarification and answer questions on the various options available to the landowners.

Many thanks to Prof. Mbote for coming all the way from Nairobi to attend the meeting and to Mike and Diane Prettejohn for hosting us.

REHABILITATION OF PHASE I ON-GOING

CFA Member at Kabage Forest Station points at Baboon proof loops installed on the Aberdare Fence as rehabilitation progresses

Rehabilitation of the Aberdare Fence Phase 1 on-going at TreeTops

Rehabilitation of the Aberdare Fence Phase 1 on-going at Wamugis Corner

SCHOOL OF HOPE PROJECT (SOH)

Pupils in-charge of SOH-Wanjerere library

Pupils and members of SOH-Wanjerere participated in tree-planting within their school compound

FEEDBACK AND TESTIMONIALS

JOHN ARAP KOECH, OGIEK COMMUNITY MEMBER - KIPKORIS, SOUTH WESTERN MAU - ON BIOENTERPRISE

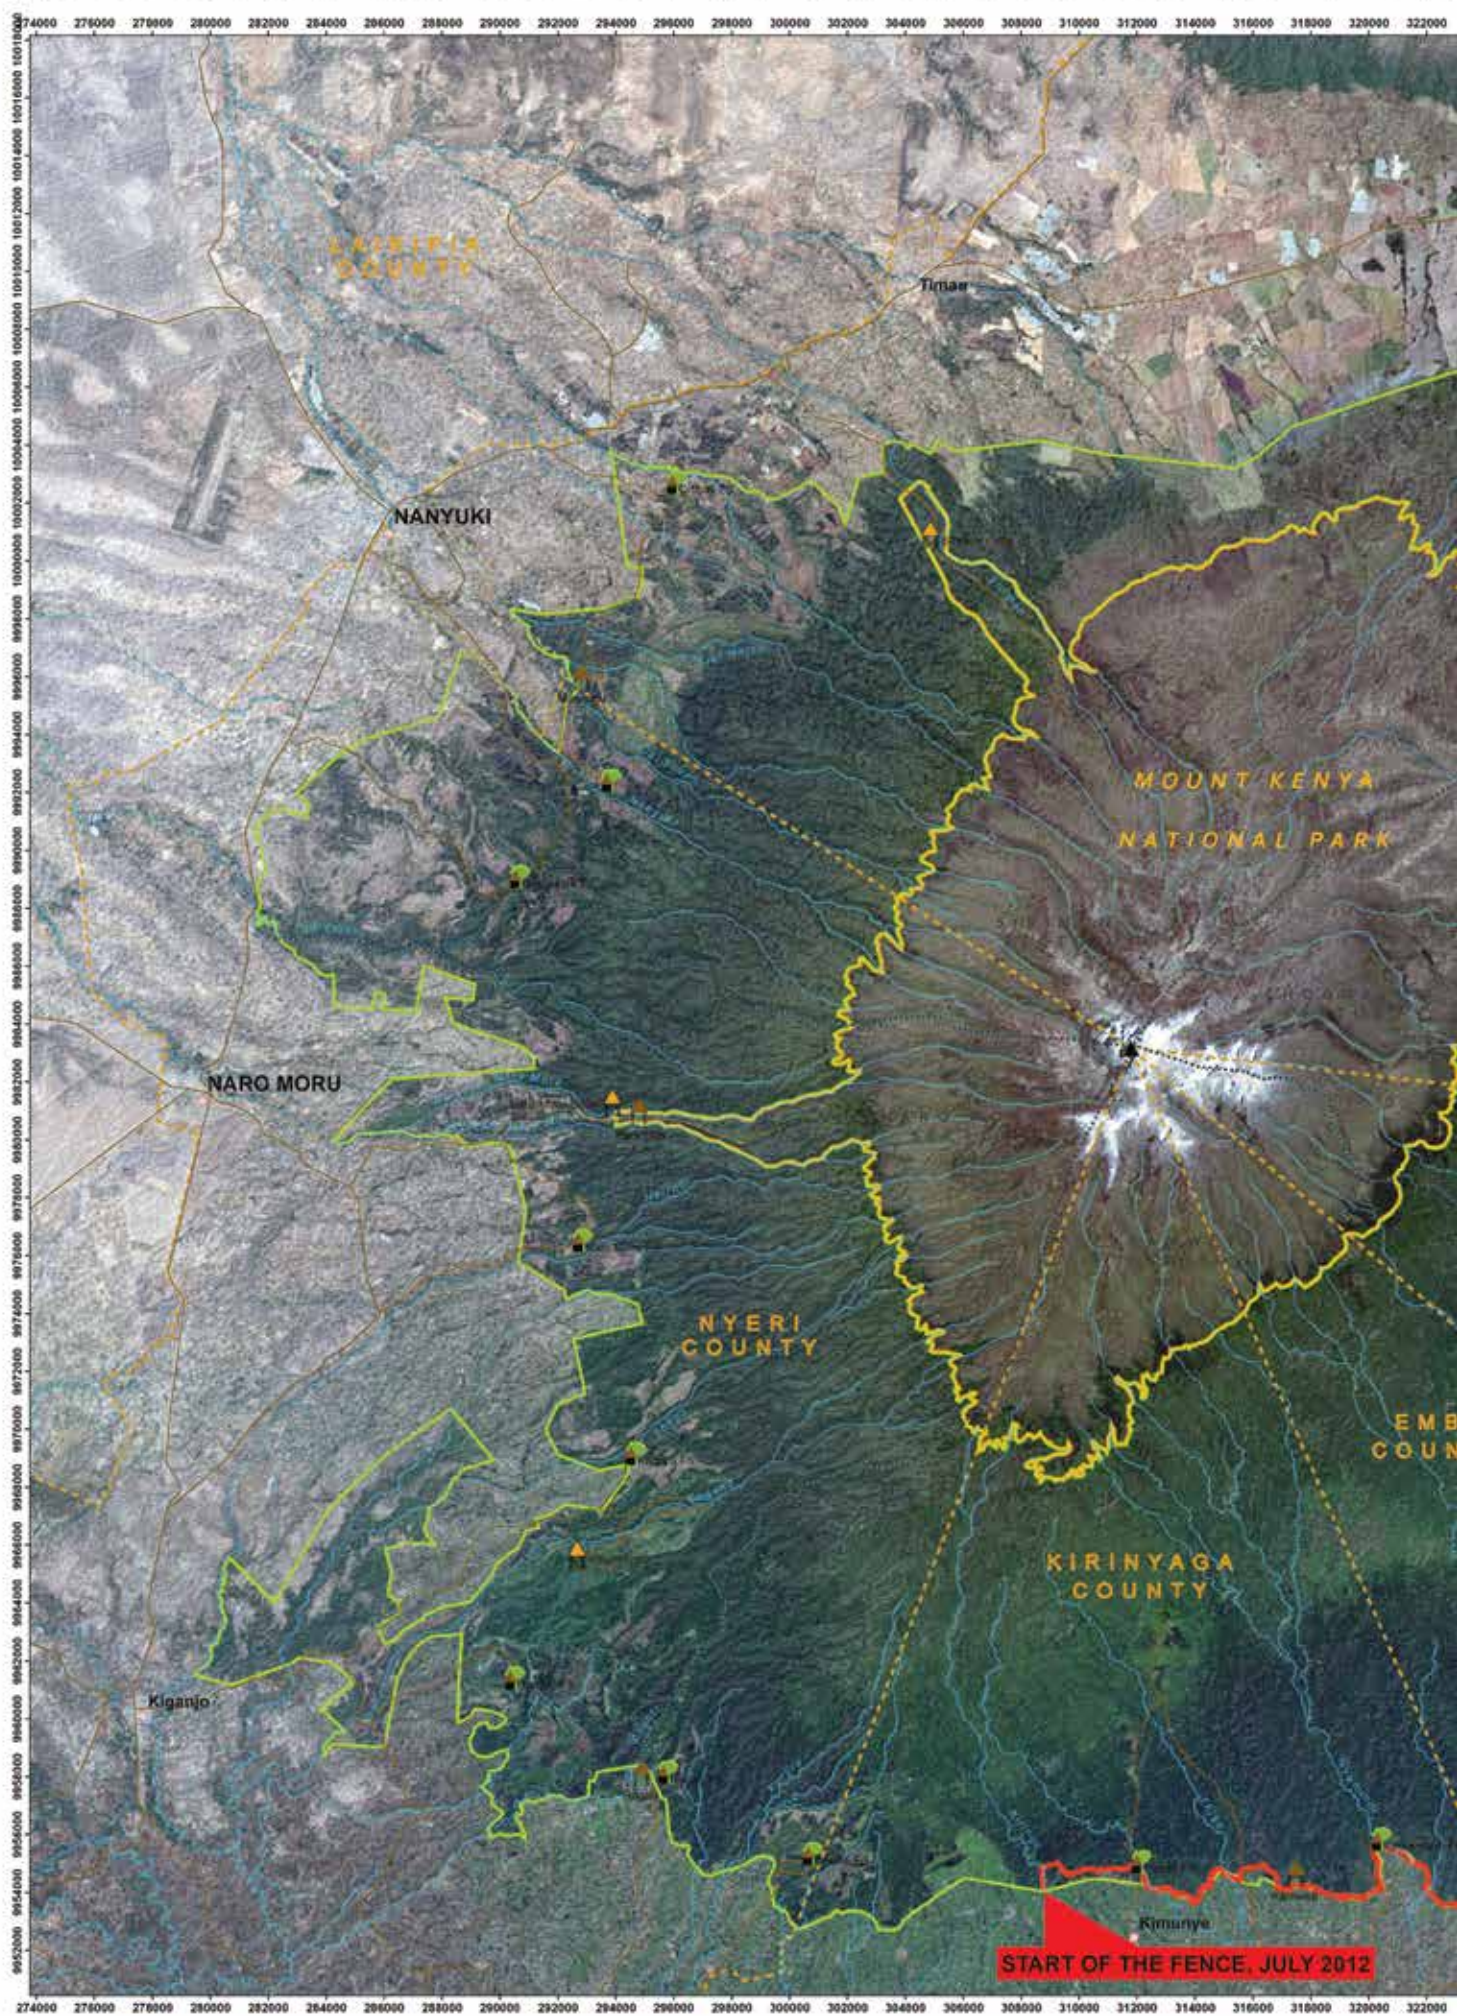

“Rhino Ark’s work in South Western Mau Forest has impacted the livelihoods of community in that the CFA user groups have been educated on the importance of the conservation of the forest. Indigenous tree nurseries have been started immediately after the training - I am glad to say that Rhino Ark will change the lives of Ogiek Community. The production of honey will be realised in the next six months.”

KENNEDY MOGAKA, MOROP AREA, EBURU - ON 2018 COMMUNITY OUTREACH PROGRAMME AND RHINO ARK SUPPORT

“Sincerely speaking, the programme this year is the best. It is implementing what was agreed and discussed in last years’ barazas. We have benefitted from the key experts that Rhino Ark brought to address our issues - Agricultural Officer, Tourism Officer, KWS Warden and our Eburu CFA Chairman who have shed light on our participatory management plan document. This is the first organization to bring such a programme where we the community can express our issues in an open forum and we are answered correctly and with respect. This programme continues to open our eyes to see different alternatives in our lives, apart from what we depended on, that is our Eburu forest. Now if what we have learnt is implemented and our products get market, the forest is safe. All we ask is a follow up of this programme and start of implementation.”
